

Water Level Model

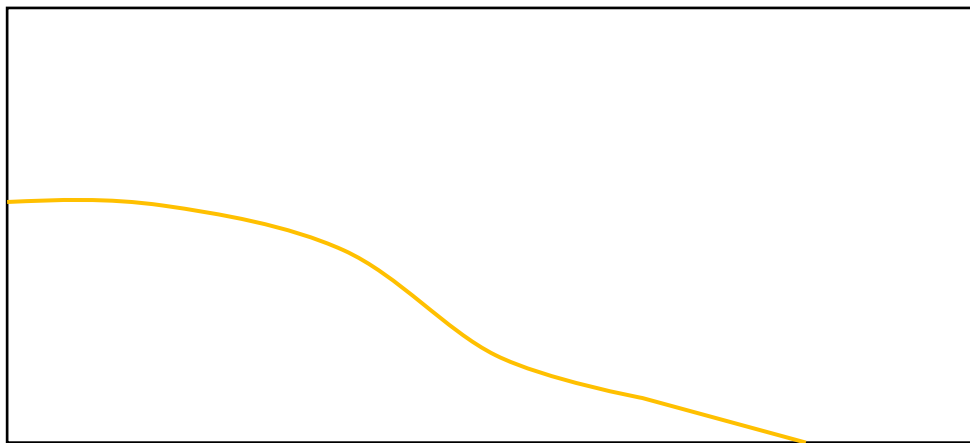

Name: _____

Date: _____

Pre-activity:

What is the water level in the model before the ice melts? _____

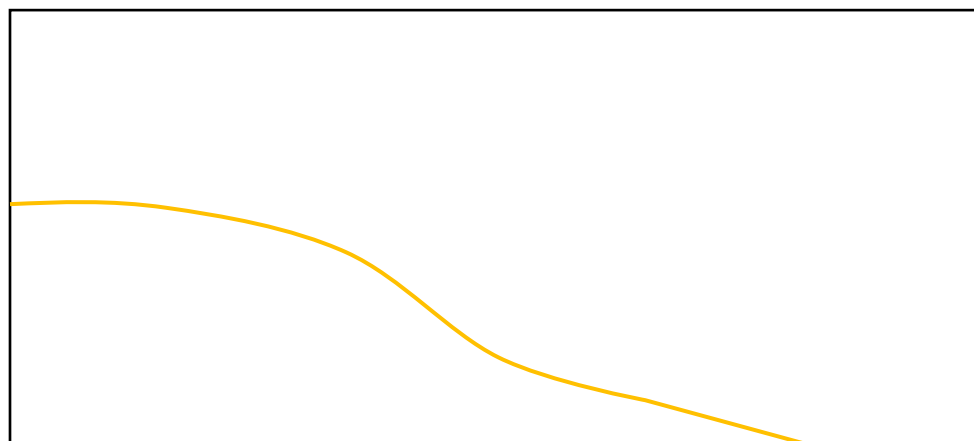

Draw a coastal environment like the one in the model with normal water levels. Draw any animals, people or buildings that represent what you might find around the coast in North Carolina.

Post-activity:

What is the water level in the model after the ice melts? _____

Now, draw the same coastal environment in a scenario with higher water levels.

What or who might be affected by the higher water levels? Explain why.

What areas around your school or home do you predict will be affected by higher sea levels?
Why?
